

REMARKS

This Amendment corrects an obvious typographical error in claims 1 and 13. Support for this correction is found in the illustrative compounds of the Examples, such as Example 37, and in the description of G itself ("iminodiacetic acid ester groups"). Claims 1-13 are pending. A version with markings showing changes made is attached as an Appendix.

Examiner Lewis is thanked for the courtesies extended to the undersigned during a telephonic discussion held January 31, 2003. During the teleconference the Examiner explained that claim 1 appeared not to read on compound 37 due to the description of G in claim 1.

This Amendment rewrites claims 1 and 13 in direct response to the Patent Office Communication and the January 31, 2003 teleconference with the Examiner. More specifically, G has been corrected in those claims. Claims 1, 4, 5, 8, 10 and 11 now read on the elected species of compound 37.

It is not believed any fee is required for entry and consideration of this Amendment. Nevertheless, the Commissioner is
